About College

Janta College Bakewar was established in the year 1959, with its motto "Achchhe Vidyarthi Achchhe Nagrik". Today, the institution holds the reputation of being one of the best educational institutions not only in India but also abroad with a rich and resourceful alumni network. Besides our focus on quality education across several academic streams through our learned and qualified faculties, we are working with society at large, for their comprehensive upliftment. Our institution is affiliated with C.S.J.M. University, Kanpur, and has one of the best infrastructure, lush green campus, rich library, well equipped laboratories, science and agriculture museum, developed dairy and agricultural farm including fruit orchard. Our staff and students work together throughout the academic year with keen focus on multidimensional development.

Situated in the town of Bakewar, Janta College is strategically situated, approximately, at a distance of 23 Km from District head quarter Etawah, 140 Km from Kanpur, 212 Km from Lucknow, 140 Km from Agra and 340 Km from Delhi. Etawah City is well connected to regular Rail and Bus services to all major cities of the state.

Purpose of Seminar

India operates as an agriculture-based economy, with a majority of its population depending on this sector for their livelihoods. Agriculture contributes significantly, comprising 18.30% of the country's total gross domestic product. Despite its importance in production, distribution, and consumption, natural resources for agriculture are limited.

Sustainability in agriculture production is crucial for ensuring food security, maintaining soil and plant health over an extended period. Unfortunately, India faces challenges, such as the hazardous use of pesticides without proper parameters and limitations, resulting in issues like sickness, pathogen resistance, and pest resurgence. Addressing these problems requires adopting a concept of natural farming to guarantee sustainability in agriculture.

To shed light on this, the seminar will primarily focus on technology and innovations that are easily adaptable for farmers, aiming to dispel myths surrounding natural farming. The seminar's purpose is to empower students, researchers, and farmers by enhancing their understanding of topics related to innovation, technology, and advanced strategies in agriculture.

Theme of the Seminar

- Recent Advances in Shri Anna (Millets) Production Technology
- Hi-Tech Horticulture and Precision farming
- Advances in Post Harvest Management of Horticultural & Cereals
